OAK BARREL

Our oak barrels are decorative and utility products, which can be used as a promotional gift (keepsakes) items, designed to be placed into various operations and also function as a bins for long-time-keeping and maturing distilates.

Oak barrels are manufactured according to original barrel-making technology. Stave's and head's timber oak is selected by traditional criteria. Staves are bended up on fire with gently or mediumly crozzled core of barrel.

Hoops and rivets are made up from stainless steel, bronze colored by special thermal treatment. Stands are also from oak timber. Oak bangs are about to seal up bung holes. According to customers's requirements, brass or wooden oak taps can be imbedded.

External surface is cerated by beeswax or paraffin, that outlines wooden drawing, becomes less sensitive to external influences, moderates distilate's natural vaporization, but his age will not be affected.

Oak barrels with circular cross-section				
Comes with	Volume (l)			
	1	2	3	5
Stand and waxed surface	42 €	57 €	66 €	75 €
Stand, brass tap, waxed surface	58 €	74 €	83 €	92 €

Actual pricelist valid from 1.4.2015 (AKURATNY, Ltd. is not subject to VAT)

All prices are informative and may be dealt. Prices may vary on individual requests on customization and the number of pieces (when ordering over 10 pieces, up to 10% price discount is possible - depends on size and execution). Logo, inscription or ornament engraving cost will be individually appointed when ordering.

Hereby referred barrels volumes determine size category, actual volume is usually a little more bigger (rarely less).
